Re-Fabric AI.

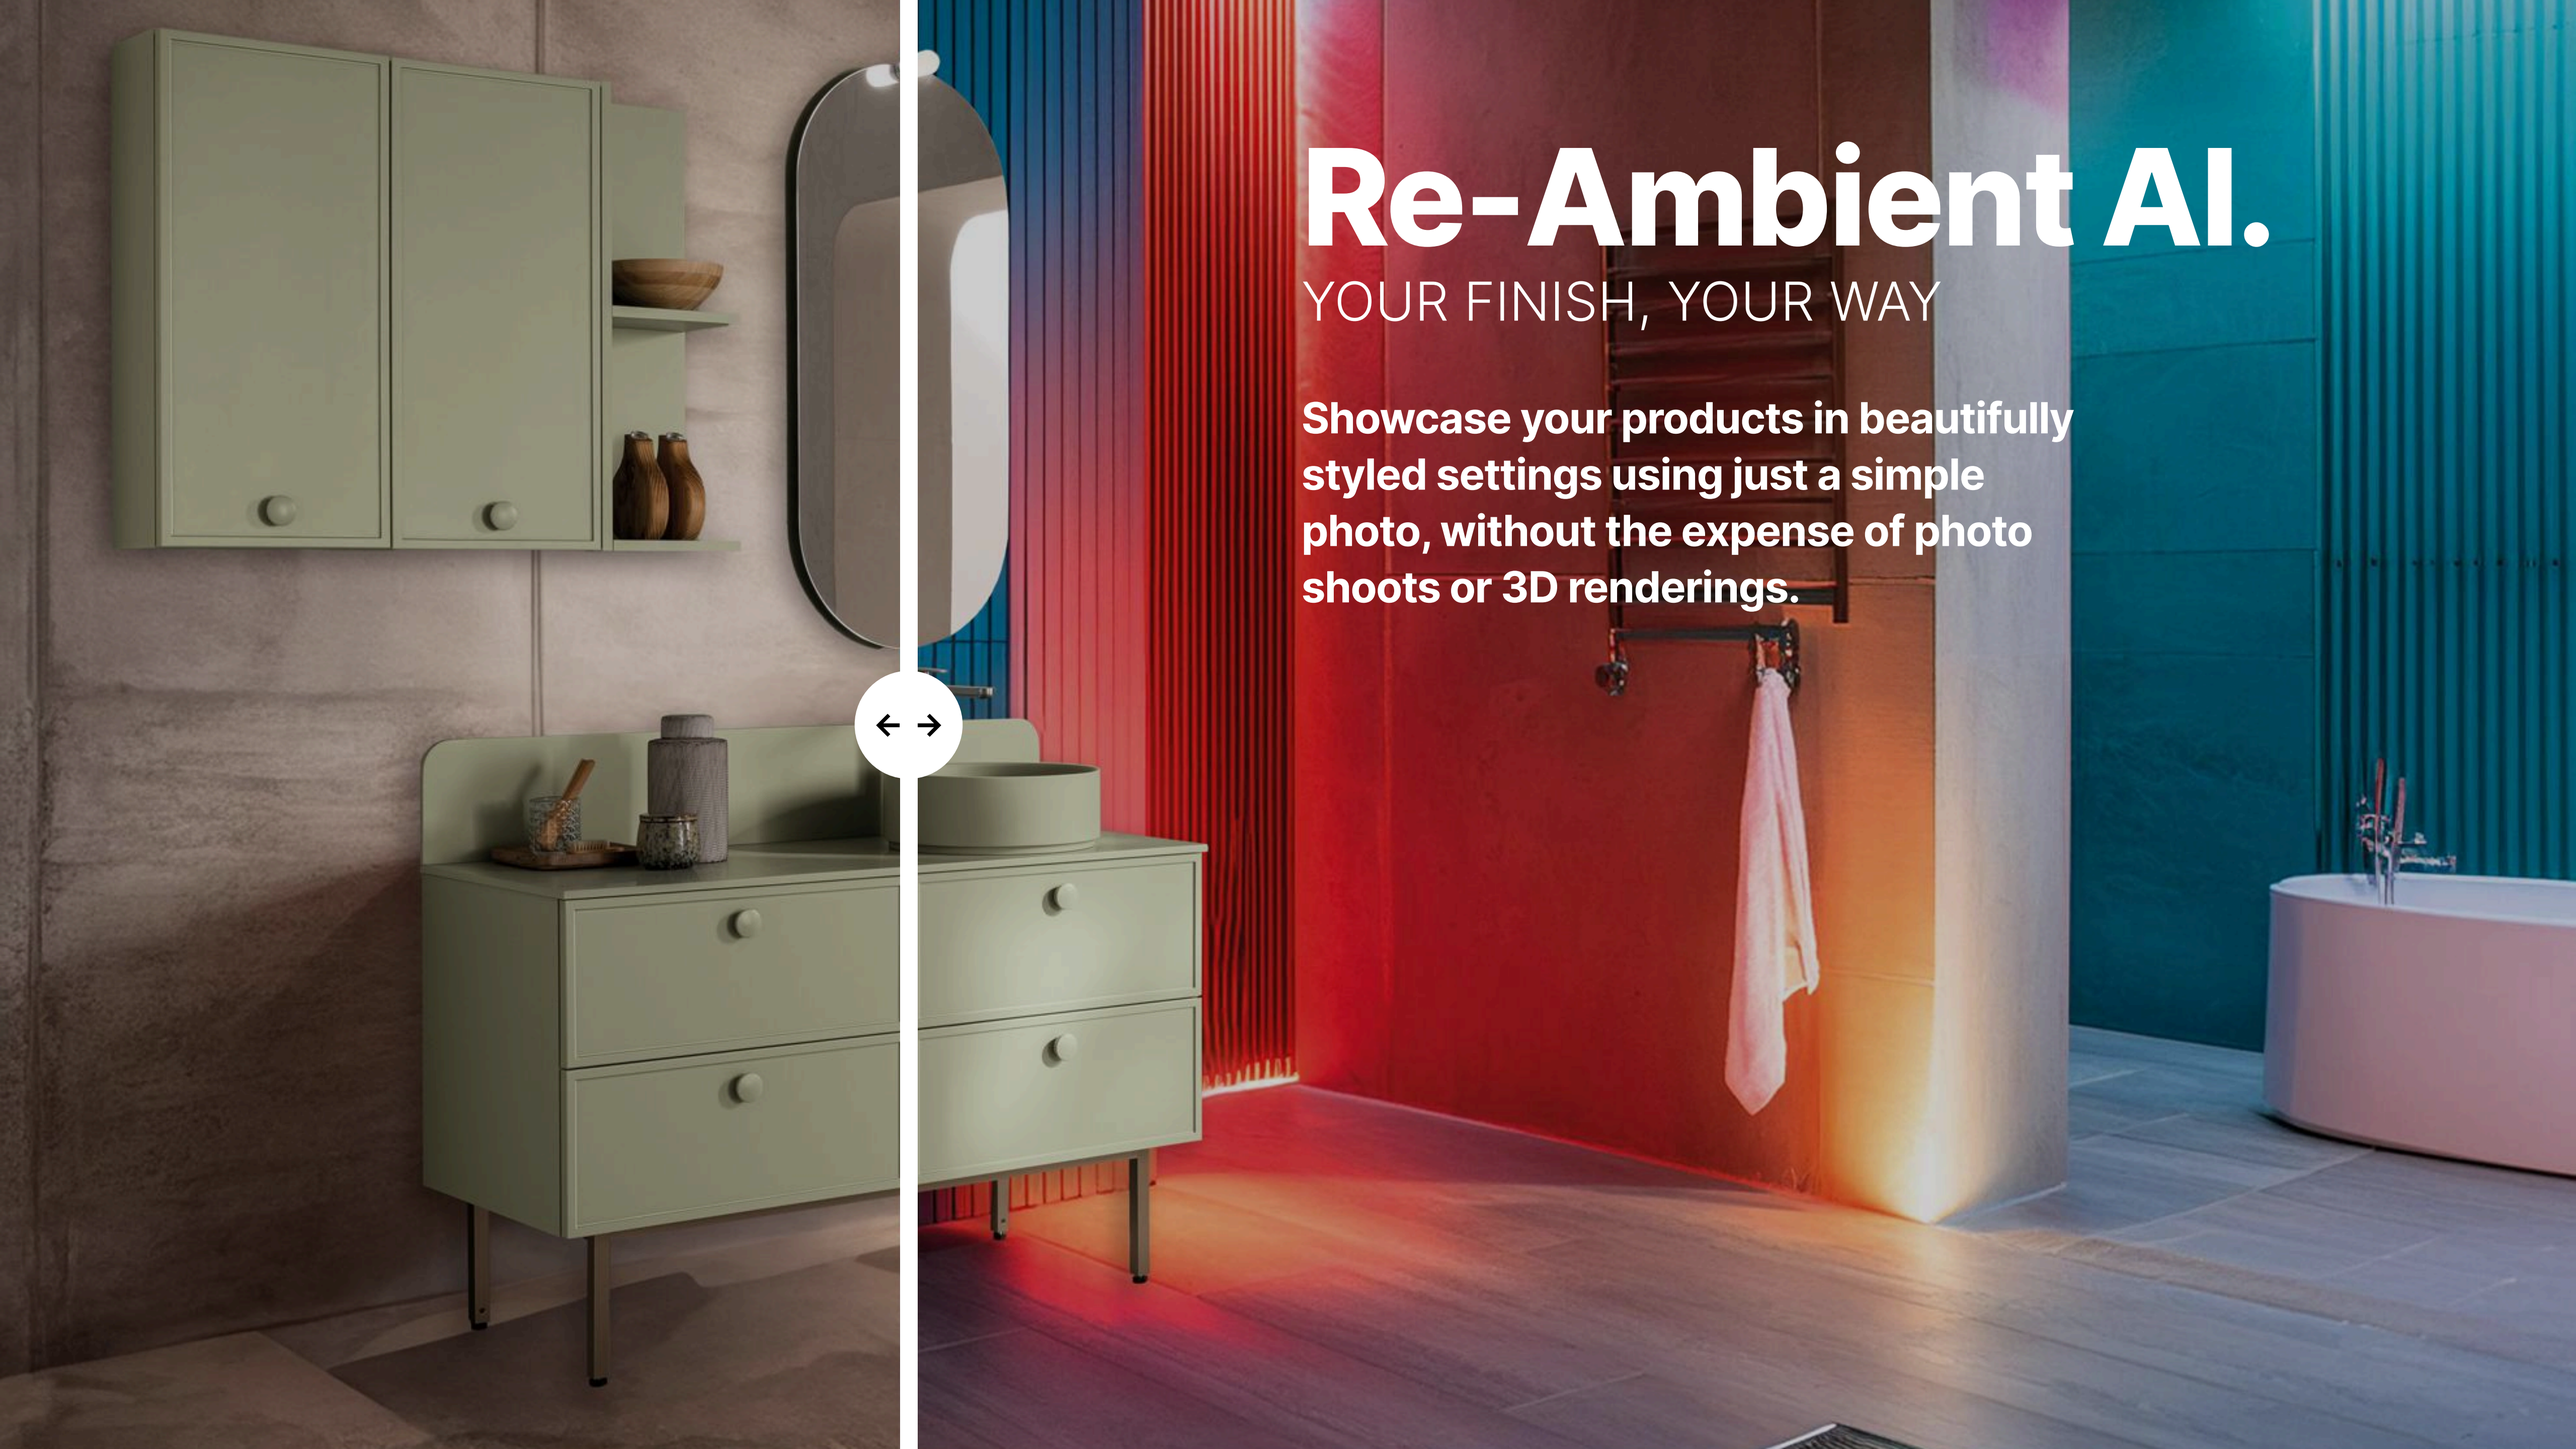
YOUR FINISH, YOUR WAY

Preview endless combinations of fabrics and materials starting with just a single photograph.

Re-Ambient AI.

YOUR SPACE, YOUR STYLE

Easily modify, visualize, and optimize spaces in real-time with a simple text prompt.



Re-Ambient AI.

YOUR FINISH, YOUR WAY

Showcase your products in beautifully styled settings using just a simple photo, without the expense of photo shoots or 3D renderings.

- Just a simple text prompt
- Avoid costly sets or 3D renderings
- Realistic contexts in real-time

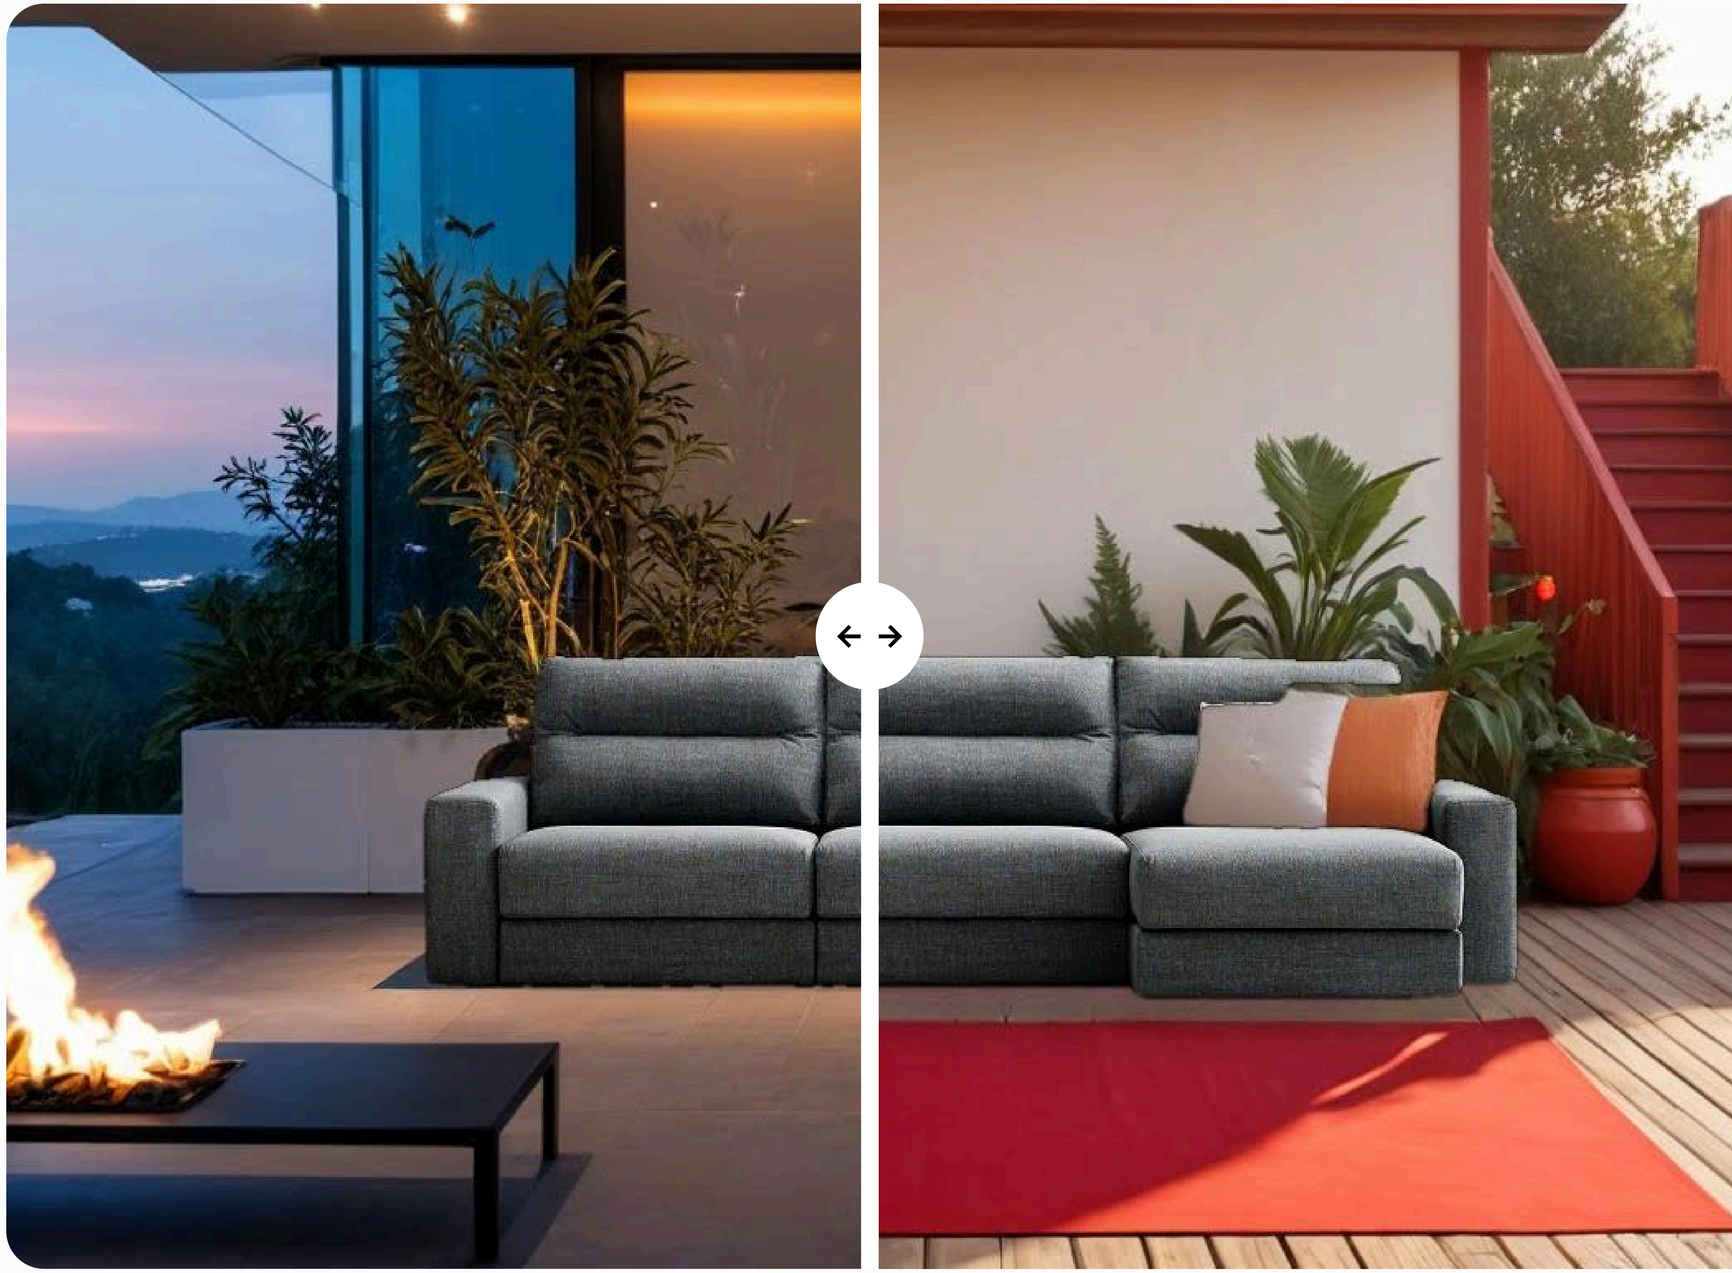
Any piece of furniture can be placed into **realistic virtual settings generated in real-time**, ranging from classic to contemporary styles, from luxury offices to airport lounges.

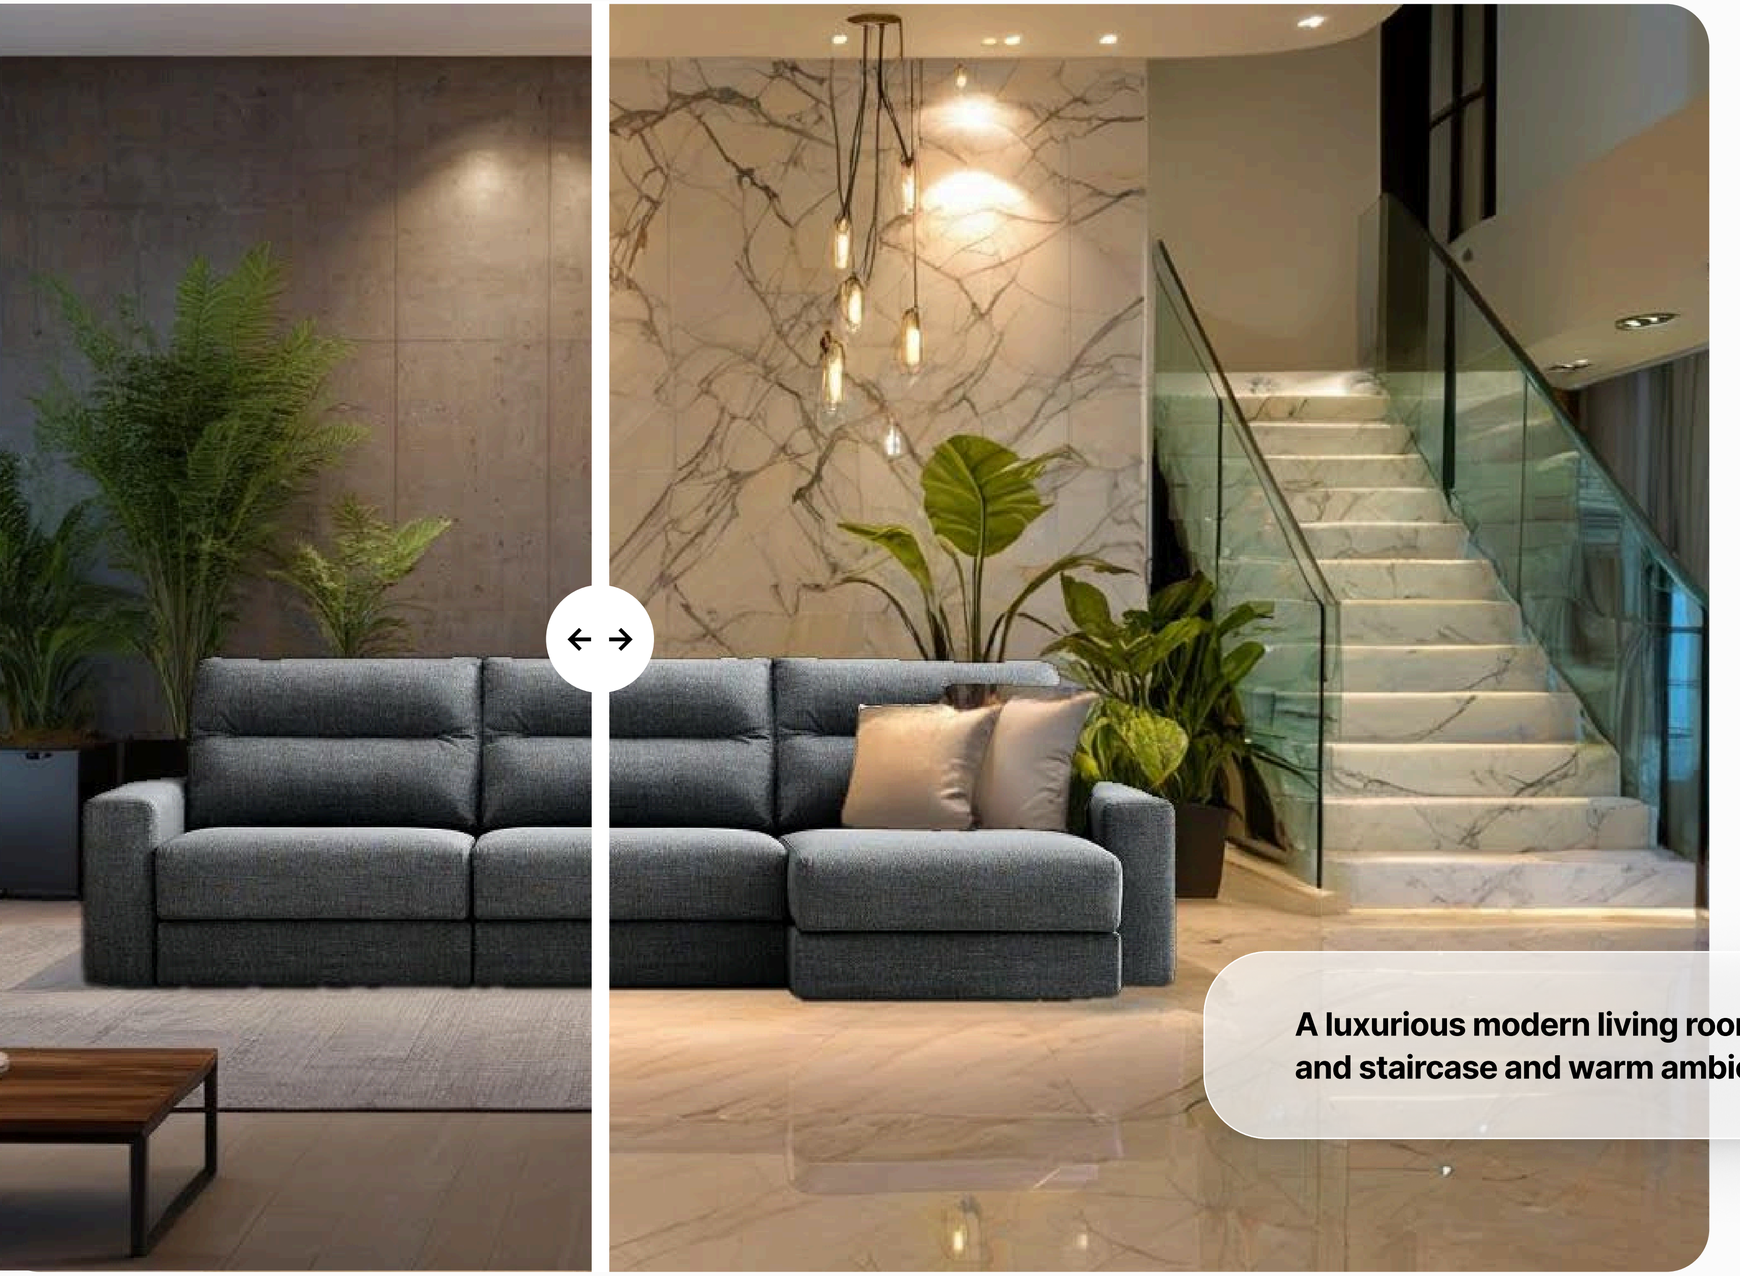
Re-Ambient AI.
YOUR SPACE, YOUR STYLE

Photorealistic environments powered by AI

Our generative AI model enables the creation of an unlimited variety of environments for your product.

All it takes is a single photo—no need for 3D setups or rendering.





Re-Ambient AI.
YOUR SPACE, YOUR STYLE

Custom styles with simple text prompts

Generate environments effortlessly using straightforward text prompts.

A luxurious modern living room with a marble floor and staircase and warm ambient lighting

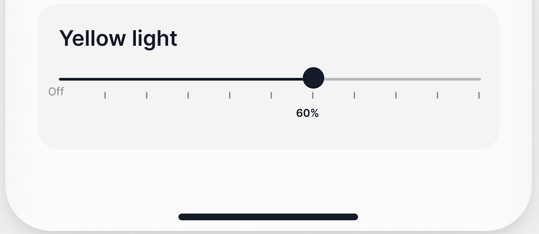
YOUR SPACE, YOUR STYLE

Seamless integration with websites and apps

Re-Ambient AI can be **easily integrated into your corporate website**, providing a configurator and product preview images for your customers.

This makes AI-generated environments **accessible to both your customers and sales agents**, streamlining the entire experience.



Why choose Re-Ambient AI and Re-Fabric AI?

Boost sales performance

Provide your customers with a rich, personalized visual experience that simplifies decision-making.

The ability to generate environments and material configurations in real-time allows you to swiftly adapt your presentations and offers, enhancing sales efficiency and reducing response times.

Cost-Effective Alternative to Traditional Methods

Eliminate the need for expensive photo sessions, elaborate sets, and physical samples.

Our Generative AI technology offers an economical and highly versatile solution to showcase your products in various environments and materials, starting from simple photographs.

Easy Integration with Web and App

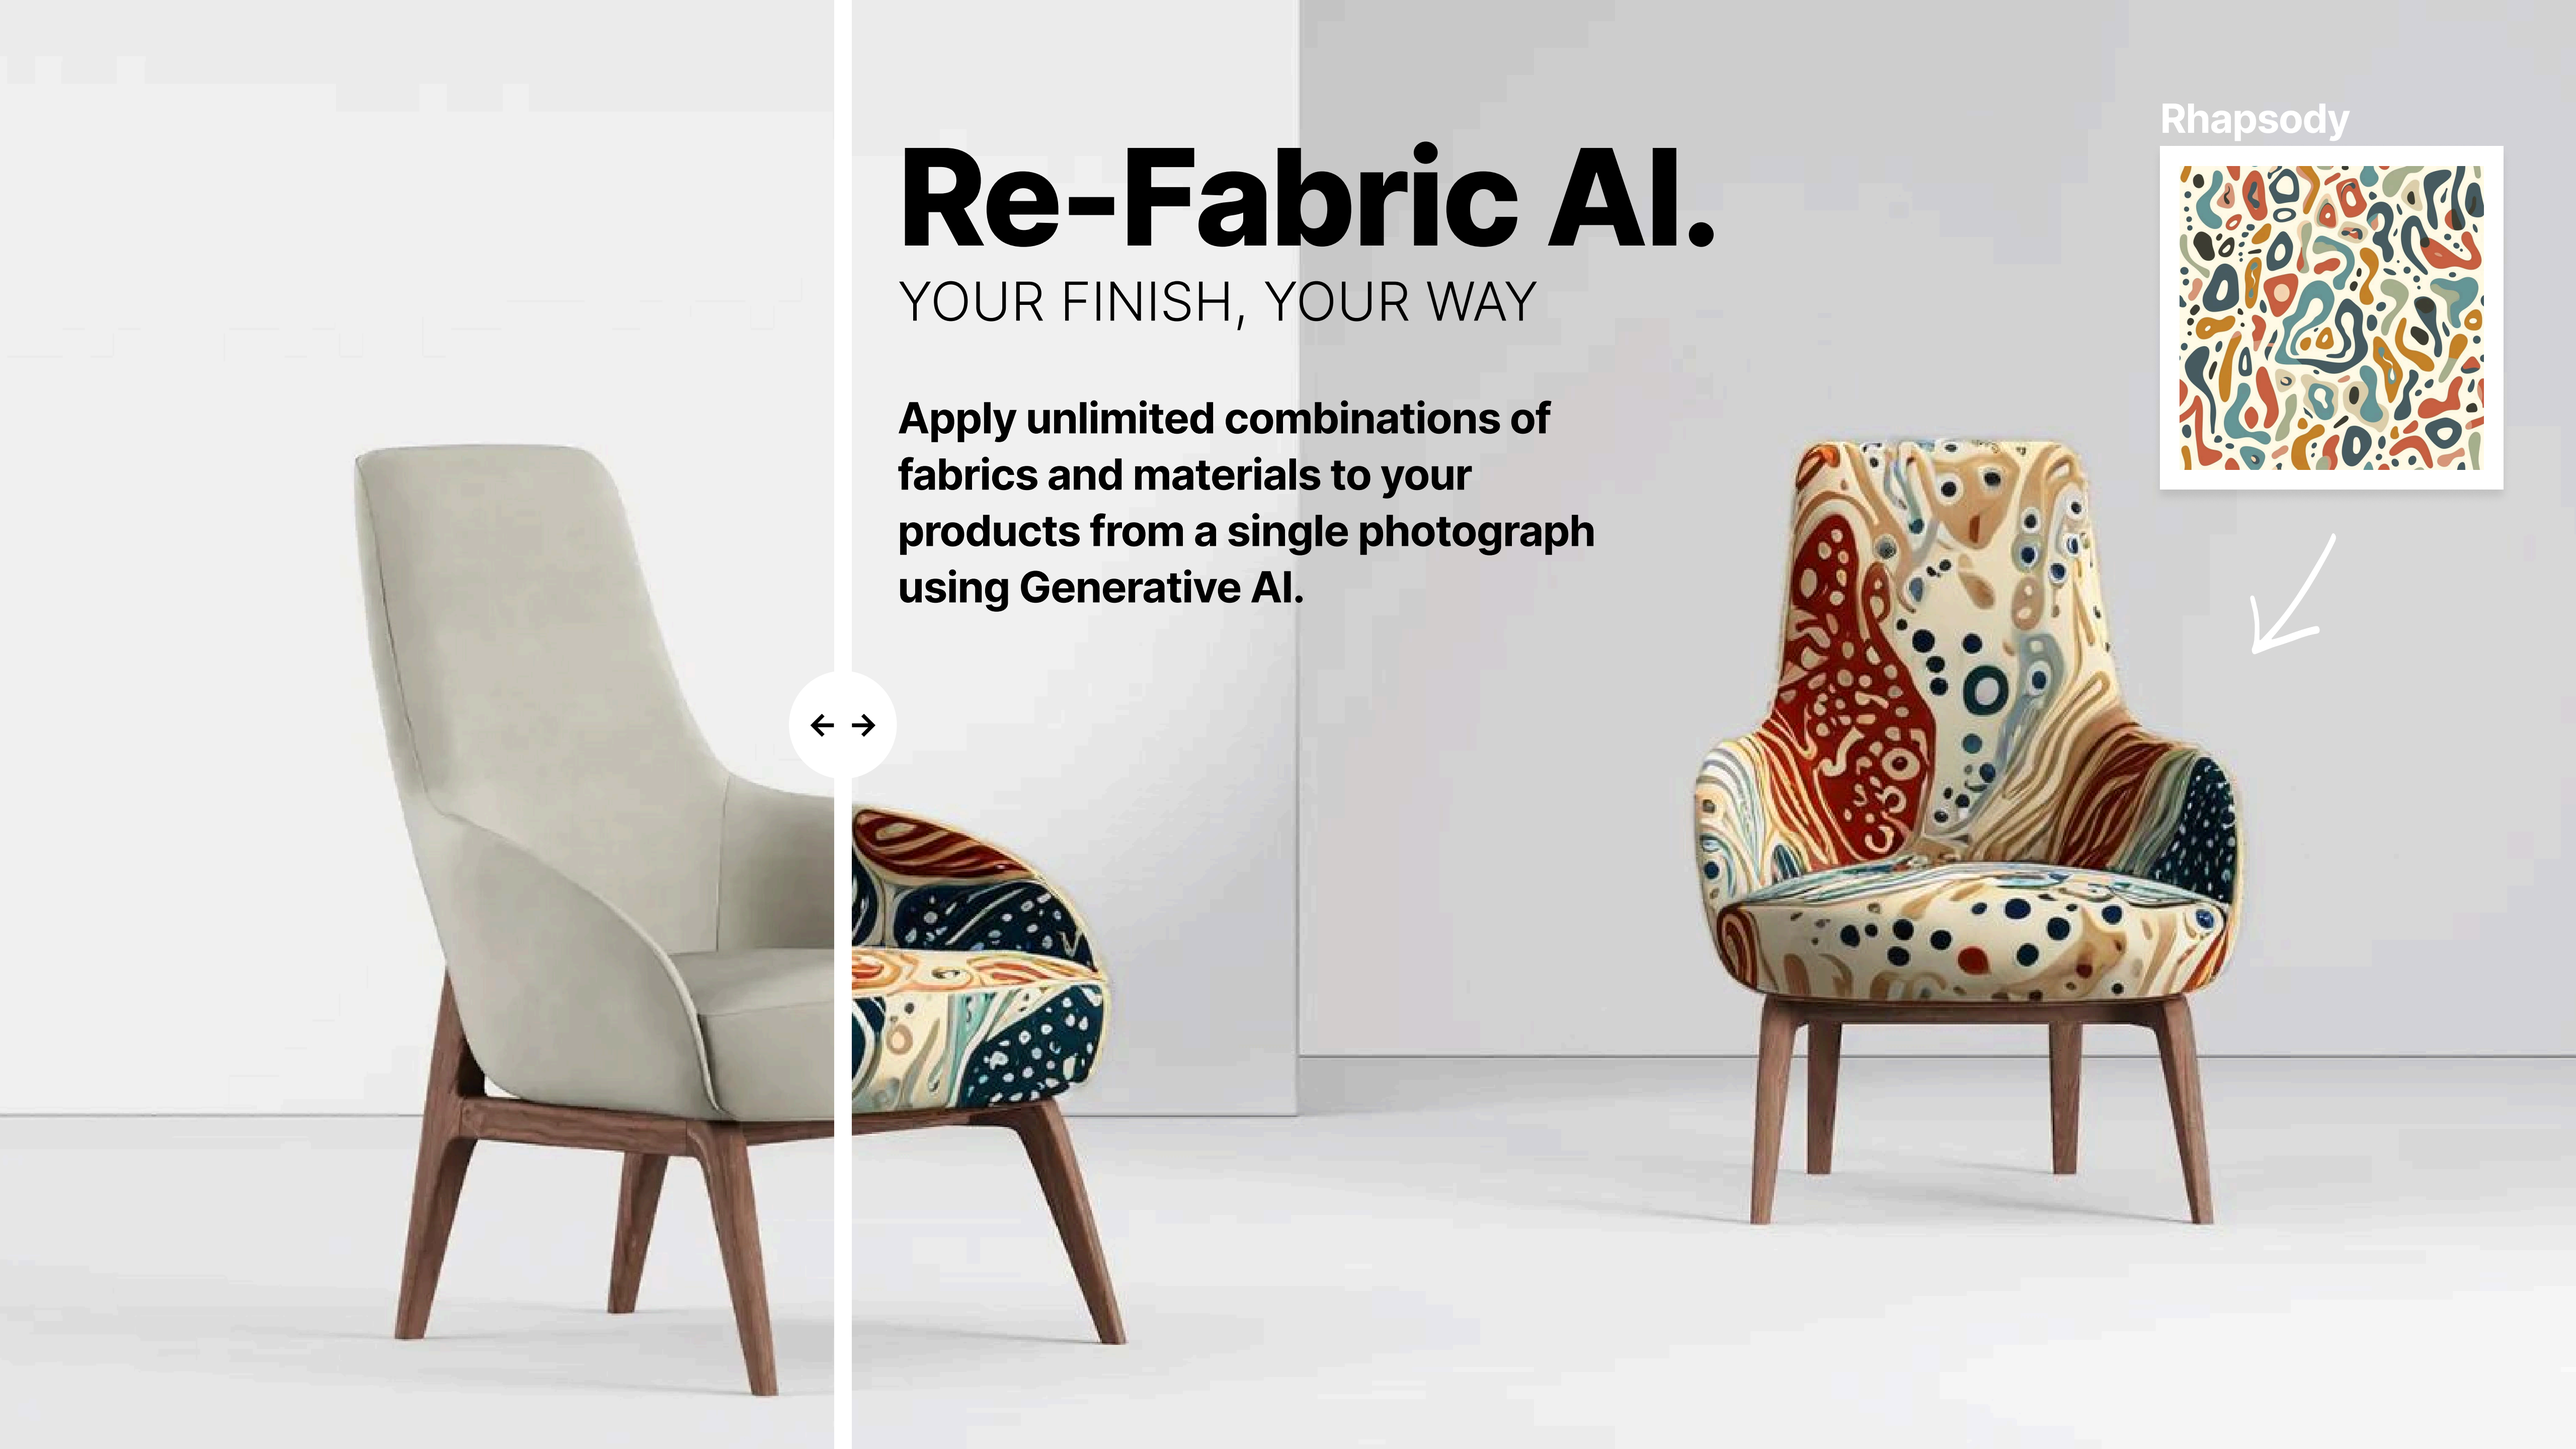
You can integrate Re-Ambient AI and Re-Fabric AI into your corporate website to provide a configurator and product preview images for your customers.

This makes AI-generated environments accessible to both clients and agents.

Re-Fabric AI.

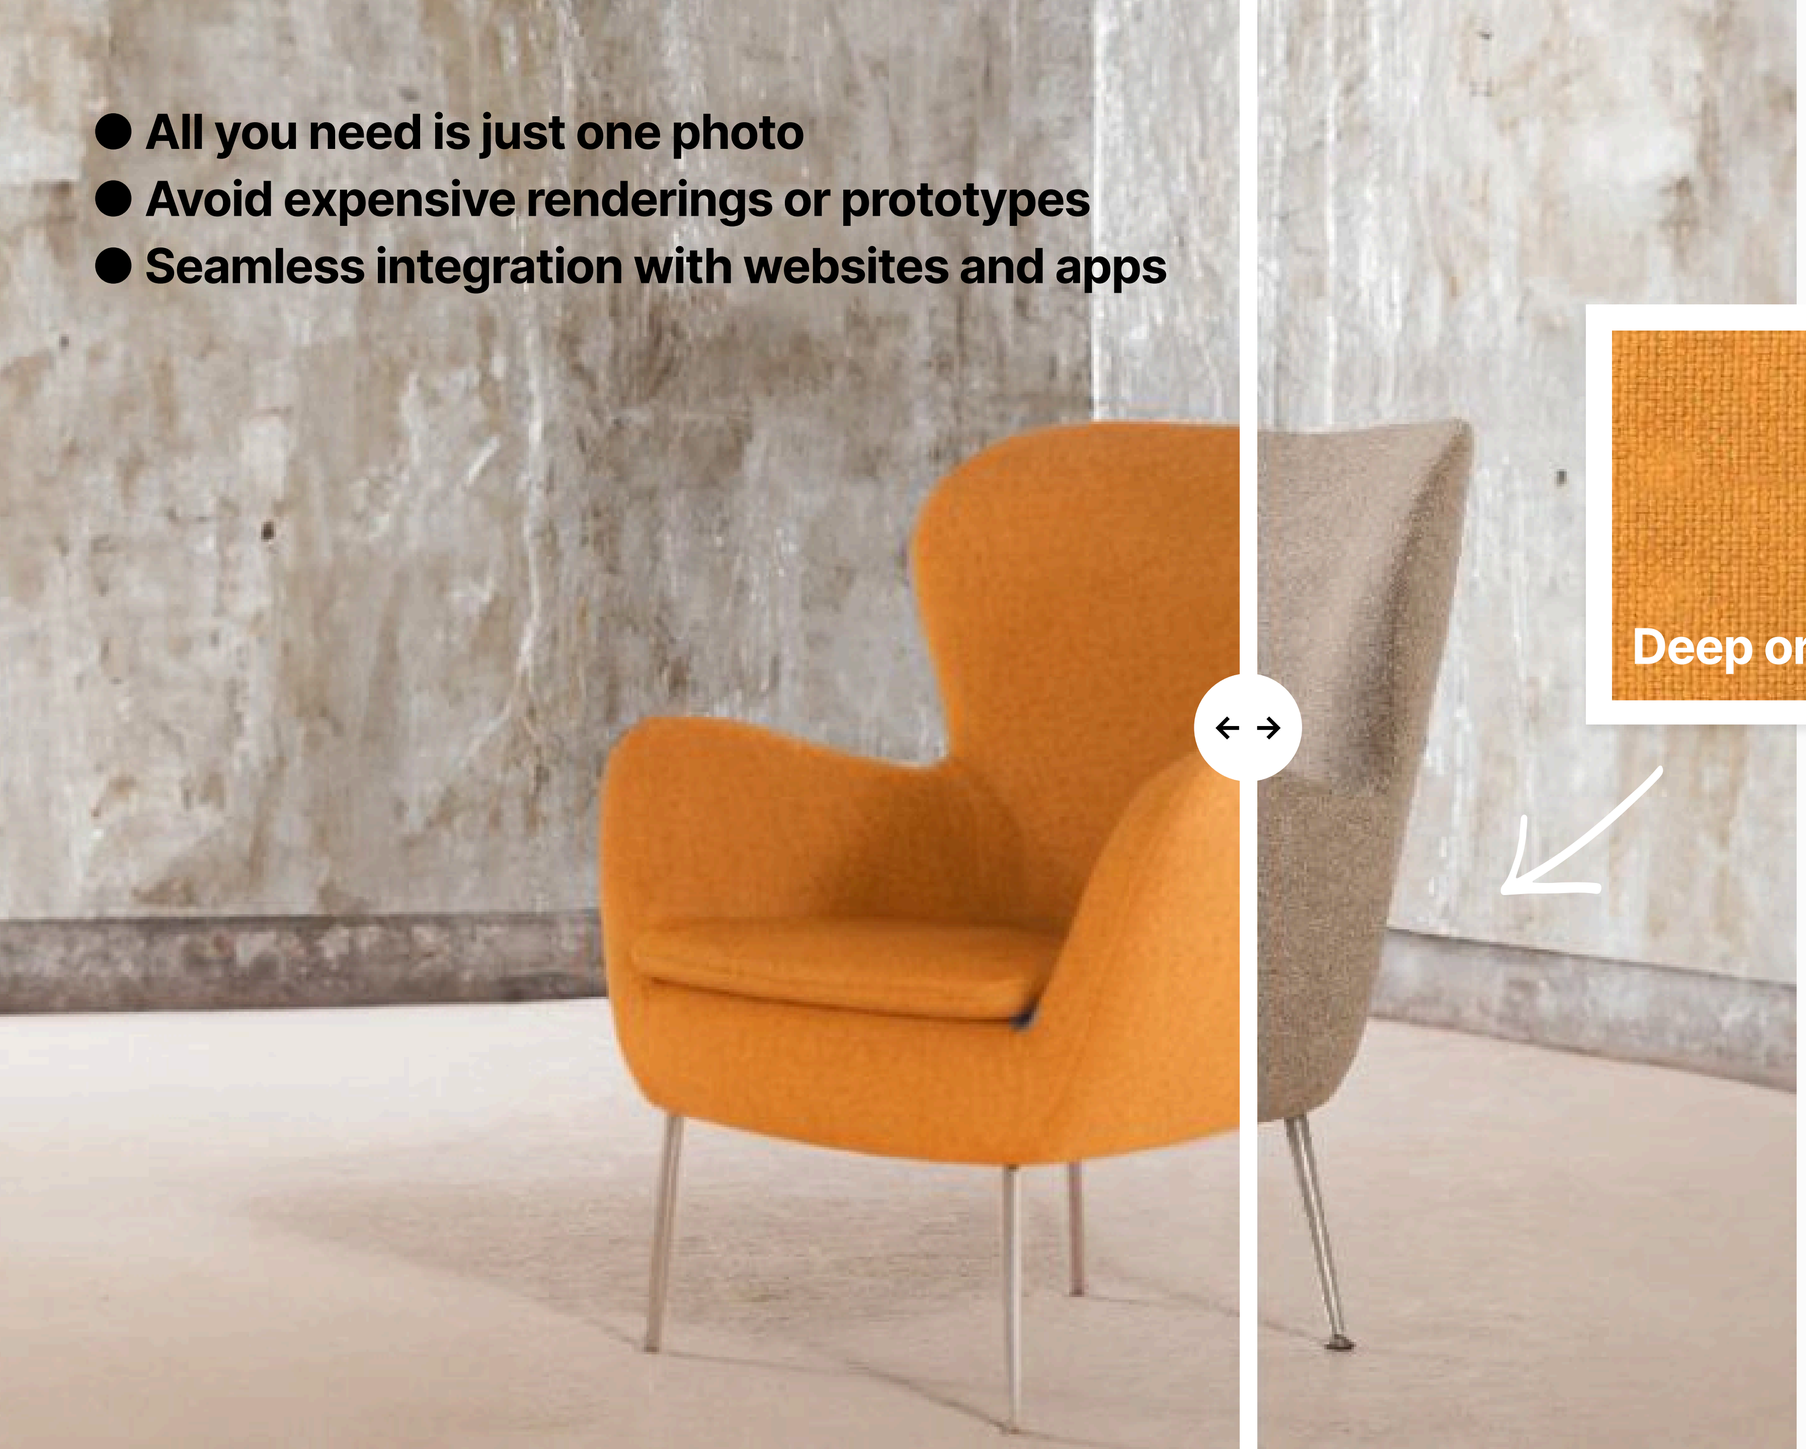
YOUR FINISH, YOUR WAY

Apply unlimited combinations of fabrics and materials to your products from a single photograph using Generative AI.



Rhapsody

- **All you need is just one photo**
- **Avoid expensive renderings or prototypes**
- **Seamless integration with websites and apps**



Re-Fabric AI.

YOUR FINISH, YOUR WAY

Showcase your products with various finishes and colors to **simulate the final product before production**.

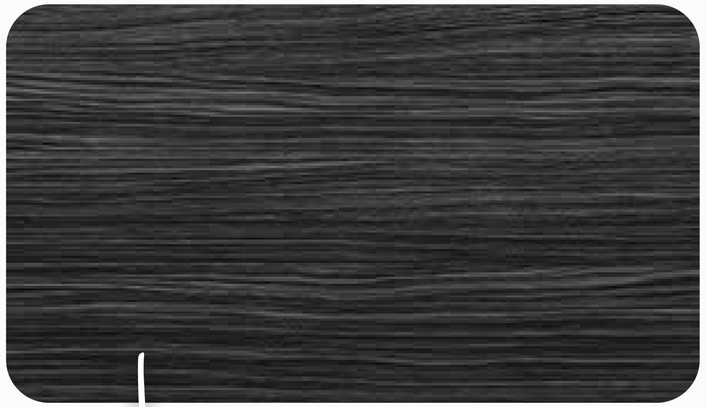
Customers can see the product in a setting similar to their own and **preview it with their preferred finish**, all before it’s even manufactured.

Re-Fabric AI.
YOUR FINISH, YOUR WAY

Texture and finish transfer

Our AI model wraps your product in the desired finish with precision, starting from a product photo and a sample of the finish.

No 3D setups or renderings required.



Re-Fabric AI.

YOUR FINISH, YOUR WAY

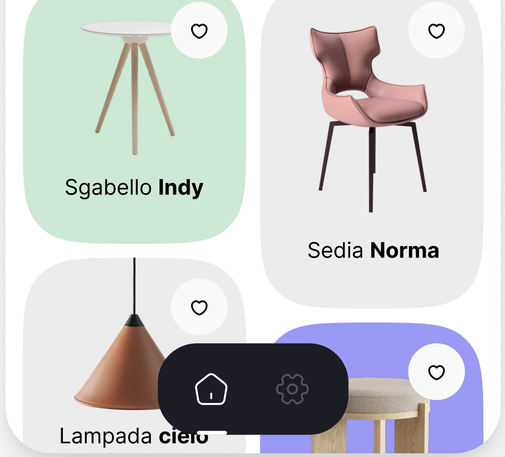
Complex and natural finishes

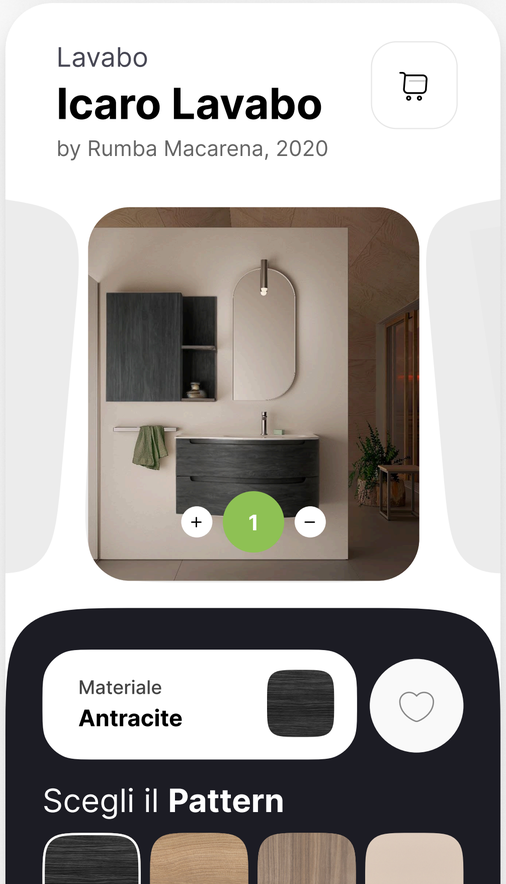
The AI naturally extends non-uniform finishes, like wood grains, to cover your product realistically, starting from a simple photographic sample.

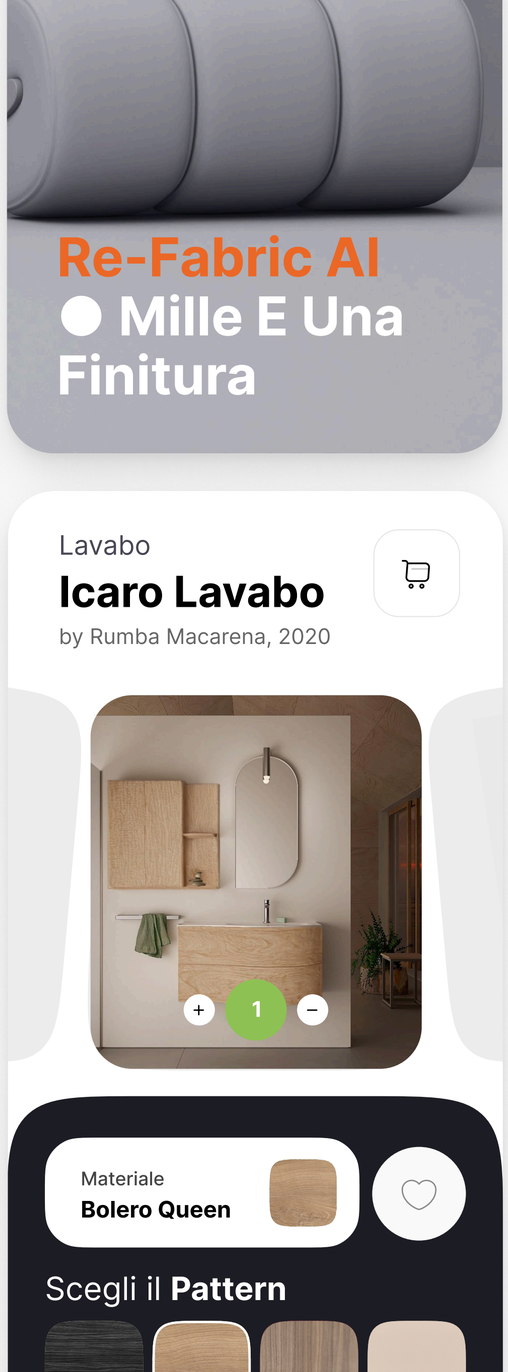
Re-Fabric AI.
YOUR FINISH, YOUR WAY

Seamless integration with Web and Apps

Re-Fabric AI can be integrated into your website, providing a configurator and preview images of your products for customers.







Why Choose Us?

Cutting-Edge technology

We leverage the latest generation of Artificial Intelligence to deliver outstanding visual quality and an unmatched user experience.

Personalized support

We support you every step of the way, from the initial configuration to the ongoing customization of your system, our team provides expert guidance and tailored assistance.

We'll help you unlock the full potential of our AI-powered tools to meet your business needs.

Integration with your systems

Our technology integrates seamlessly with your corporate website or management systems, offering a configurator and product preview images for your customers.
